
(a) Kite energy
Spin polarization ζ
r_s
e_{kite} (mRy per electron)
(b) Polarization energy from the kite
$\Delta e_{\mathrm{kite}} = e_{\mathrm{kite}}(r_s, \zeta) - e_{\mathrm{kite}}(r_s, 0)$ (mRy)
$\zeta = 0.4$
$\zeta = 0.8$
$\zeta = 1$
$\zeta = 1$: $r_s \simeq 464$
